Stop Motion Studio

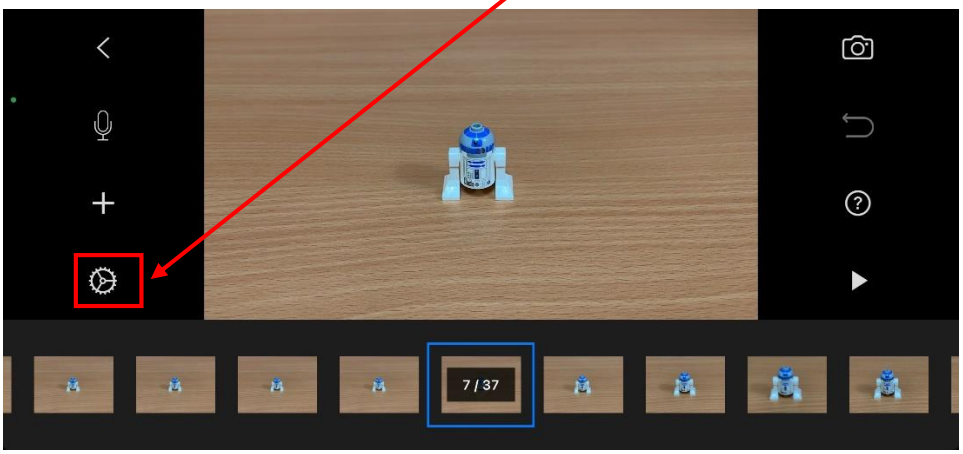

How to use app

1. Download and install the free ***Stop Motion Studio*** app for your phone or tablet from App Store (iOS) or Google Play (Android).

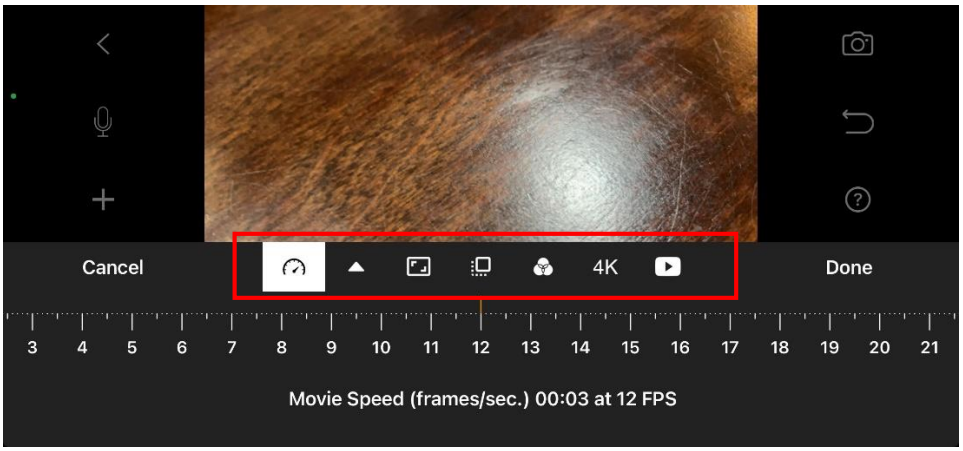

2. Launch Stop Motion app and allow camera access for the first time. To start your movie tapo n the big button ***New Movie***

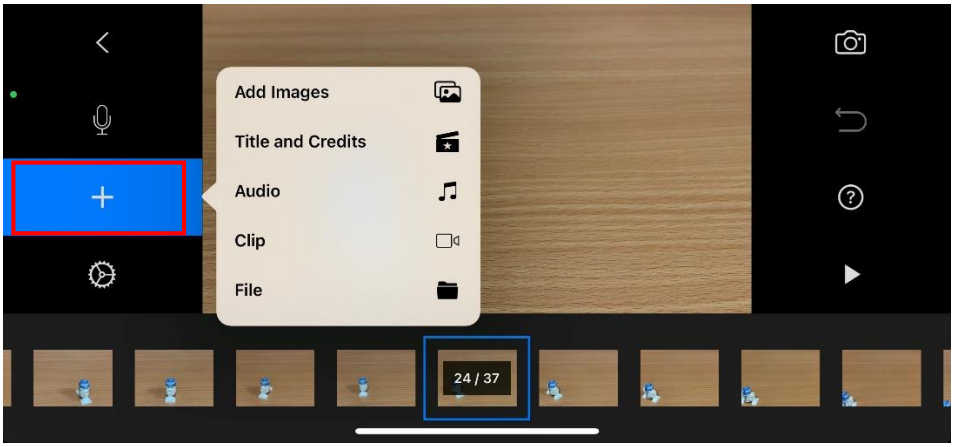

3. The gear icon gives us access to some ***Settings***: Movie speed, Fade, Aspect Ratio, Foreground, Filter, Quality, Playback.

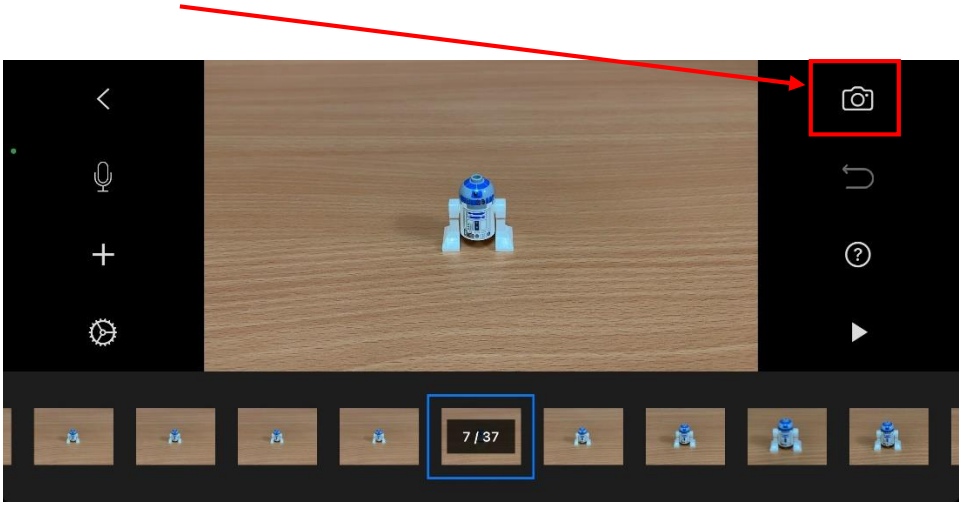

4. If it is need, change movie Setting. For example if you set 12 frames/sec. Speed, it means you need to take 12 pictures to have 1 sec. movie.

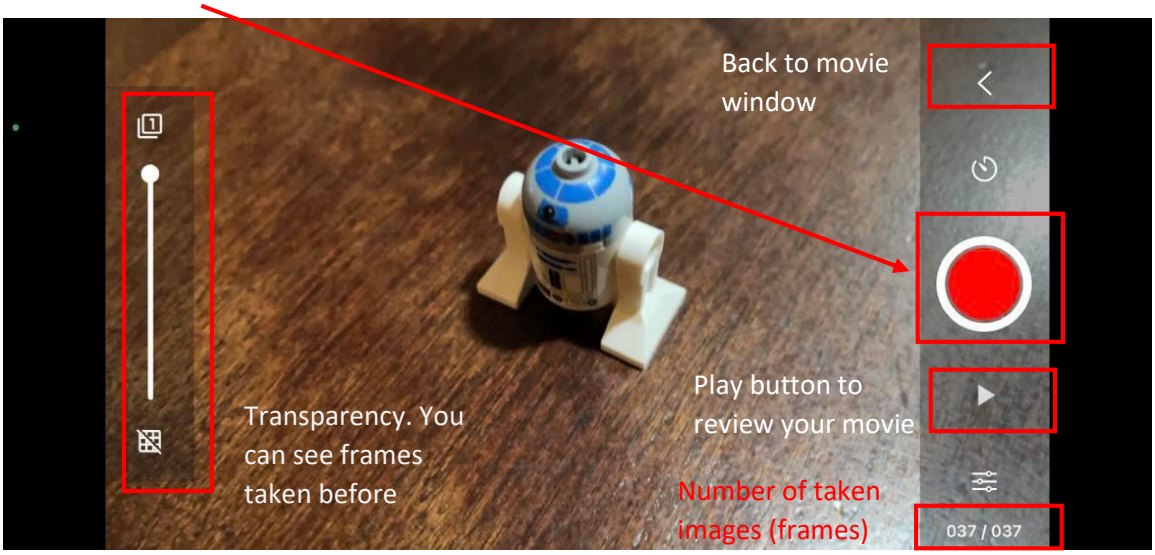

5. Tapo n + button to add audio or sound effects and in paid version: titles and credits, audio ,clip and file.

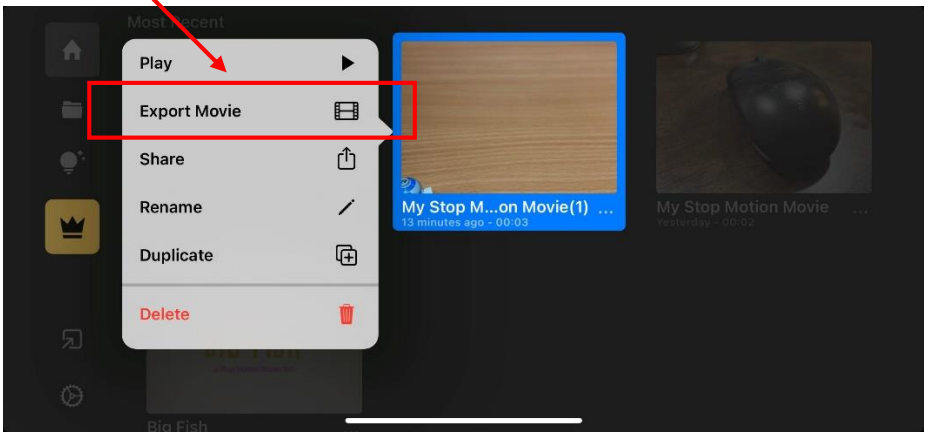

6. Tap on ***Camera*** icon to start taking photos for your movie.

7. Press on ***Red dot*** button to capture image.

8. Press Back < button to reach your app home window. Tap and hold while open menu with ***Export Movie*** choice.

9. Choose where you want to export. Not to loose quality of movie suggest export to Google Drive, Drop Box etc.
