Notes & Lyrics Space

Yo the ice caps meltin', oceans on the rise,
Smoke in the skies, can't believe my eyes.
Droughts where it used to pour, floods where it's dry,
Mother Earth's cryin' and we still askin' why.

Le climat change, et nous alors?
Parler sans agir, ou croire en l'aurore?
La planète brûle, ça suffit comme ça,
Si la nature souffre, on tombera avec elle, crois-moi.

Klimatas keičias - o kaip mes?
Tik kalbėsim, ar kilsim iš tamsos?
Ši planeta dega - gana tulos,
Jei ganta pavojui, pavojui ir mes.

Politicians stallin', just playin' the game,
While wildfires rage like a dragon untamed.
Plastic seas, toxic breeze, corporate greed,
But we the people, we're the change that we need.

Αλλάζει το κλίμα - κι εμείς τι θα πούμε;
Θα μείνουμε στα λόγια ή θα ξεσηκωθούμε;
Ο πλανήτης φλέγεται - φτάνει πια!
Αν κινδυνεύει η φύση, κινδυνεύουμε κι εμείς

Il clima sta cambiando - e noi che si fa?
Parliamo soltanto o si agirà?
Il pianeta brucia, ora basta così
Se la natura è in pericolo, lo siamo anche noi, sì.

Eco-warriors, youth on the rise,
Changin' the world, no compromise.
We got knowledge, tech, and a cause that's just.
So next time you ask, what about us?

Hook 4
(Full power)

Climate is changing, what about us?
Hearts full of fire, minds full of trust.
We are the storm, the wind, the gust -
Together we rise, 'cause chang starts with us.
