Intro

Yo, the planet's crying
can you hear that beat?
Melting ice dripping like
rhymes on the street.
We're the generation,
We can't stay still,
Future is in danger but
We've got the will.

Climate is changing, what
about us?
Rise up together, in green we
trust. Voices are the future,
the moment is here

Outro

Clock keeps ticking dont
waste the chance, join
the movement, the planet
can dance. Climate is
changing, what about us?
This is our anthem, powerful,
just.

Yo, the planet's crying can you hear
that beat?
Melting ice dripping like chymes on the street
We're the generation, we can't stay still
Futures in danger, but we've got the will
